

# Standard ERP

integration with  **omniva**

## Send, receive and manage your invoices electronically

### Fast

Boost productivity by sending and receiving e-Invoices directly from and to Standard ERP in real-time.

### Easy

Electronically manage your entire invoicing process in a single, fully-integrated system.

### Efficient

Reduce errors and improve efficiency by eliminating manual data entry.

## Standard ERP

Standard ERP offers an intuitive suite of business management tools for reconciling accounts, processing orders, inventory, contact relationship management (CRM), reporting and more.

Designed for businesses of all sizes in almost any industry, Standard ERP delivers a high level of integration not only between its core component elements, but also with a variety of third party service providers.

Standard ERP provides a series of industry-specific modules which are fully integrated, including industries such as:

- Distribution
- Professional Services
- Maintenance companies
- Hotel industry
- Manufacturing
- Creative environments
- Facilities management
- Rental companies
- Retail

## Omniva

Omniva provides e-Invoicing services that help companies to be more efficient by making the entire process of invoice processing cheaper, faster and more transparent. Now available in Standard ERP, it allows our customers to automate their invoice processing and save valuable time otherwise spent on manual data management.

The integration with Omniva's e-Invoicing services allows you to send and receive invoices electronically within Standard ERP. Once you've created an invoice, the data is processed through Omniva and distributed to your customers. As soon as you select "OK" and save an invoice, it will automatically be sent to the customer and registered in their database. If the receiver's system does not support automatic processing, they will instead receive their invoice via email with the PDF version attached.

Manage invoices coming from different sources, e-invoices, PDF-invoices and paper invoices, all in one place. Omniva provides a service that allows you to automatically receive any incoming invoice as scanned invoice in Standard ERP, digitalising even paper invoices.

Bookkeeping and accounting for your company is more convenient as this integration provides quick and easy creation and reception of invoices in an e-Service environment, getting you one step closer to being a paperless company.
